SUMMARY REPORT
FT 930-I

May 1965

FOR RELEASE
July 19, 1965

IMPORT TRADE BY COMMODITY

The Bureau of the Census, Department of Commerce, announced today that the decrease in U.S. general imports of merchandise from $1,854.9 million in April[1] to $1,724.1 million in May[2] reflected decreases in imports of 8 of the 10 Schedule A commodity sections. The more notable decreases were in imports of mineral fuels, lubricants and related materials; machinery and transport equipment; and manufactured goods classified chiefly by material.

Imports of mineral fuels, lubricants, and related materials decreased from $196.0 million in April to $154.7 million in May, due primarily to lower levels of imports of crude petroleum, from $99.5 to $76.4 million and fuel oil, from $70.9 to $54.0 million. Machinery and transport equipment decreased from $265.8 to $230.8 million, owing to decreases in imports of new passenger cars, from $69.7 to $46.3 million; textile sewing and shoe machinery from $15.9 to $12.4 million and tractors and agricultural machinery from $22.5 to $19.8 million. These decreases were partially offset by an increase in imports of civilian and military aircraft and parts, from $6.7 to $12.5 million.

The decrease in imports of manufactured goods classified chiefly by material from $488.7 million in April to $459.5 million in May was in part the result of decreases in imports of copper and alloys (blister, refined, and mill shapes), from $50.3 to $26.6 million; and woven fabric, wholly of jute, from $19.2 to $12.9 million; which were partially offset by an increase in imports of iron and steel mill products, from $100.8 to $109.4 million. The chief causes for the decline in imports of inedible crude materials, except fuels, from $262.6 to $247.4 million were decreases in imports of crude rubber, from $24.4 to $13.5 million; and unmanufactured wool, from $25.2 to $16.4 million. However, imports of iron ore and concentrates, also included in this Schedule A section, rose from $32.8 to $42.7 million.

Imports of beverages and tobacco decreased from $61.3 to $47.6 million, due largely to the decrease in imports of unmanufactured tobacco from $26.1 to $15.8 million. Other schedule A commodity sections which decreased were: miscellaneous manufactured articles from $160.0 to $151.3 million; chemicals, from $73.1 to $64.9 million; and animal and vegetable oils and fats, from $13.9 to $11.8 million.

Although there was no change in the value of imports of food and live animals, $290.6 million for April and May, there were several notable counter balancing changes within the section. Decreases were shown for imports of coffee, from $83.7 to $77.2 million; and fruits, nuts and vegetables, except oil nuts, from $52.0 to $45.8 million. Increases were reported for imports of fresh, chilled or frozen beef from $9.5 to $15.8 million; and fresh, frozen, dried, and salted fish, from $26.3 to $32.4 million. Imports of commodities and transaction not classified according to kind increased from $43.0 to $65.4 million.

[1] For comments on the effect on the statistics of the dock strike in 1965 at east coast and Gulf ports, see the March and April 1965 issues of Summary Reports FT 900-I and FT 900-E.

[2] On a seasonally adjusted basis, total general imports were valued at $1,798.9 million in May as compared to $1,834.7 million in April. (See the May 1965 issue of Report FT 900-I.)

EXPLANATION OF STATISTICS

COVERAGE: Import statistics include merchandise imported by government agencies as well as by private importers, but exclude American goods returned by the U.S. armed forces for their own use. U.S. trade with Puerto Rico and U.S. possessions is not included in this report but the import trade of Puerto Rico with foreign countries is included as a part of the U.S. import trade. Merchandise shipped in transit through the United States between foreign countries is not included in import statistics. However, the statistics may include some merchandise (principally duty free) which is entered through U.S. Customs and subsequently exported in the same condition in which imported. In many cases, such merchandise differs from intransit merchandise only in the manner in which it is documented.

VALUATION: The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the U.S. import duties, ocean freight and marine insurance.

RELIABILITY: Monthly import statistics for individual commodities are based on full compilation of all formal entry shipments valued $100 and over (over 99 percent of total import value) and are therefore free of sampling variability. They are, however, subject to some error due to the omission of informal entry shipments (i.e. those valued under $250) and under $100 formal entry shipments from commodity statistics, and also from such sources as the carryover of data from month to month in the compiling process and errors in the reporting or processing. Although the effect of such errors on the rounded totals in this report is probably small, the possibility of inaccuracy should be taken into account particularly in using figures of relatively small magnitude. The largest variation from rounding of figures is $50,000.

Further information regarding coverage, valuation, compilation procedures and precision of import data is contained in the foreword of Report FT 125. For complete statement, see foreword in Foreign Commerce and Navigation of the United States.

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy.
Annual subscription (FT 900, 930, 950, 970, 975, 985, and 986 combined) $5.00.

U.S. GENERAL IMPORTS OF MERCHANDISE BY SELECTED SCHEDULE A COMMODITY GROUPINGS AND PRINCIPAL COMMODITIES
MAY 1965 AND SELECTED PERIODS

(Quantity in units indicated; value in millions of dollars. General imports are commodities imported for immediate consumption plus entries into bonded warehouse. Imports for consumption are commodities imported for immediate consumption plus withdrawals for domestic consumption from bonded warehouses. Figures for 1965 are as originally issued and have not been revised to include published corrections. Figures for 1964 include all revisions published with December 1964 reports, or earlier, but do not include revisions published during 1965. Totals represent sum of unrounded figures, hence may vary slightly from sum of rounded amounts)

See footnotes at end of table.

Commodity description and unit of quantity[1]	1965			1964		
	May	April	Jan.-May	May	April	Jan.-May
Nonferrous metals - crude, blister, refined, mill shapes and scrap--Continued						
Aluminum and alloys.....value..	24.6	21.8	93.0	17.8	18.1	86.1
Nickel and alloys, including nickel oxide.....value..	15.9	16.8	81.2	13.5	15.9	68.2
Tin and alloys.....value..	13.1	11.5	60.5	7.3	7.8	42.7
Manganese and chromium ore and metal (excluding ferroalloyed forms)[4] [5]....value..	6.2	8.4	34.0	5.1	6.5	25.4

*The Bureau of the Census does not have adequate information to measure precisely the influence on the statistics of the dock strike at east coast and Gulf ports, which began January 11, 1965, and, in general, continued through the middle of February, although ending on different dates at individual ports.

**Certain shipments of this commodity were omitted from the April statistics and included in the May statistics with the result that the April statistics are undercounted and the May statistics overcounted by comparable amounts. See the special notice entitled "Data for Schedule A numbers 275.1040, 667.2020 and 990.0000 undercounted in April 1965 Statistics" in the "Special Announcements" section of the April 1965 issue of Report FT 125.

- Represents zero.

Z Indicates less than $50,000.

[1]Based on the commodity classifications listed in Schedule A, Statistical Classification of Commodities Imported into the United States, as published in the special Census Bureau publication entitled "Changes in Presentation of U.S. Import Statistics Effective 1964." A "Supplement" to Report FT 930-I showing the coverage for the individual commodity totals in terms of the Schedule A classifications is available on request.

[2]Excludes, also, wool-like hair of other animals (see footnote 8) whether on or off the skin. Wool and wool-like animal hair on the skin are included under "Hides and skins, undressed, except fur skins;" cashmere goat-hair is included with "Fur skins, undressed." All unmanufactured wool and wool-like animal hair, whether on or off the skin, are combined in Part III of this table under the summary grouping "Wool unmanufactured (including on the skin)." See footnote 8.

[3]Consolidated in Part III of this table with similar commodities, dispersed among one or more other Schedule A commodity sections in Part III, and shown under appropriate descriptive headings.

[4]Includes ores of base-metals customarily used as ferroalloying materials: manganese, chromium, tungsten, titanium, molybdenum, vanadium, zirconium, etc.

[5]Includes base metals customarily used as ferroalloying materials but not yet processed into ferroalloys. (See footnote 4, above.)

[6]Parts and accessories for agricultural tractors are shown under "Transport equipment."

[7]Formal import entries valued at less than $100 and informal entries valued at $250 or less.

[8]Includes carbonized wool and wool-like hair of other animals, on or off the skin--e.g. camels hair, alpaca, cashmere, vicuna, angora, etc.
